FRANCISCO PEDROSA | Fullstack Developer

franpedrosa04@gmail.com | 2234541211 | LinkedIn · Portfolio · GitHub | Mar del Plata, Buenos Aires, Argentina

Professional Profile

Associate Degree in Programming with a solid academic background and practical experience in web development and process automation. Specialized in the JavaScript ecosystem (Angular, Node.js, Express) and SQL, with the ability to build scalable applications and software solutions that optimize real workflows.

Work Experience

Fullstack Developer & Process Automation: Estudio Contable Bruno & Verfaillie | Nov 2025 - Present

- Backend Development (Node.js): Creation of scripts and services for the automatic generation of tax payment slips (VEPs) and bulk invoicing, integrating directly with government Web Services (AFIP/ARCA).
- Data and File Handling: Implementation of algorithms for processing large volumes of data, correction of tax files (ARCIBA format), and dynamic generation of PDF reports and vouchers.

Education

- Associate Degree in Programming – Universidad Tecnológica Nacional (UTN), 2023-2024
- React Course – CoderHouse, 2025
- Advanced Backend – CoderHouse, 2025
- Electromechanical Engineering – UNMdP, 2019-2021 (12 subjects completed)

Featured Projects and Experience

Freelance E-commerce: Web application developed with Angular (frontend) and Node.js + Express (backend), using MySQL as the database.

- Implementation of a product catalog with category navigation, secure JWT authentication, shopping cart, checkout, and an admin panel for managing products, users, and metrics.
- Modular architecture, optimized SQL queries, and Lazy Loading to improve performance.

Institutional Website - Rugby Club: Responsive website built with Angular and Node.js, featuring real-time API integration for match news, member management, and an online store with a shopping cart.

- Development of an admin panel for content and product management, optimized with a mobile-first approach, separation of frontend/backend layers, and component reusability.

Technical Skills

- **Frontend**: Angular, React, TypeScript, JavaScript, HTML, CSS, Bootstrap
- **Backend**: Node.js, Express, Knex, Java, C
- **Databases**: SQL, MySQL, SQL Workbench
- **Tools**: Git, GitHub, Postman, Jira, Trello, ClickUp
- **Languages**: Spanish (Native), English (Intermediate B2)

Professional Skills

- Fullstack web application development with best practices in architecture and security.
- Responsive interface design with a mobile-first and user experience (UX) focus.
- Problem-solving with analytical thinking, agile teamwork, and continuous learning.
