

FRANCISCO PEDROSA

Full Stack Developer | Angular | TypeScript | Node.js

franpedrosa04@gmail.com | [+54 9 223 454-1211](tel:+5492234541211) | Mar del Plata, Argentina | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Full Stack Developer with experience building production web applications and automating accounting and tax workflows. Skilled in Angular, TypeScript, Node.js, Express, MySQL, and Knex, covering REST API and database design, testing, and VPS deployment with Nginx and PM2.

WORK EXPERIENCE

Full Stack Developer & Process Automation

Estudio Contable Bruno & Verfaillie | November 2025 - Present

- Design and develop internal tools that automate high-volume accounting and tax workflows.
- Develop Node.js services integrated with AFIP/ARCA government Web Services to automate bulk invoicing and VEP generation.
- Implement ARCIBA tax file processing and validation, together with dynamic PDF report and voucher generation.
- Contribute to requirements analysis, validation, functional testing, and continuous improvement of production solutions.

SELECTED PROJECTS

Medical Appointment Management System (CPM Integral)

Production application | <https://cpmintegral.com.ar/>

- Built a medical appointment platform with a public booking portal and a multi-role internal dashboard for administrators, receptionists, and healthcare professionals.
- Designed a modular REST API with Node.js, Express, and TypeScript for provider availability, schedule blocks, manual openings, time conflicts, and variable appointment durations.
- Implemented authentication and security with JWT, bcrypt, Zod validation, Helmet, and rate limiting.
- Built an Angular 20 SPA with protected routes, reusable components, and filtered daily and weekly calendar views.
- Added unit and integration tests with Vitest and Supertest, and deployed the solution to a VPS with PM2, Nginx, and a production domain.
- Stack: Angular 20, TypeScript, Node.js, Express, MySQL, Knex, Zod, Vitest, Supertest, Nginx, and PM2.

Full Stack E-commerce & Admin Dashboard

Client project | Private repository due to confidentiality

- Designed and built an e-commerce application with a catalog, shopping cart, and checkout flow using Angular, Node.js, Express, MySQL, and Knex.
- Developed an admin dashboard for products, users, and business metrics, with JWT authentication and access control.
- Improved performance through optimized SQL queries, backend modularization, and frontend lazy loading.
- Stack: Angular, TypeScript, Node.js, Express, MySQL, Knex, and JWT.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, SCSS, Bootstrap

Backend: Node.js, Express, REST APIs, Knex, Java, C

Databases: SQL, MySQL, relational database design and modeling

Testing and deployment: Vitest, Supertest, Postman, PM2, Nginx

Tools and languages: Git, GitHub, Jira, Trello | Spanish native, English intermediate B2

EDUCATION

- University Technical Degree in Programming - Universidad Tecnológica Nacional | 2023-2024
- Advanced Backend and React Courses - CoderHouse | 2025
- Electromechanical Engineering coursework - UNMdP | 2019-2021 | 12 courses completed
